ABOUT ME

I am a person with a good understanding of application development and a strong motivation to grow professionally in my role. I can easily adapt to new work environments thanks to my team spirit and excellent listening and communication skills.

EXPERIENCE

• Front end developer

2022- actually

I have been developing various front-end projects, and recently, I created my personal website:

<https://marco-falasca.netlify.app>.

It's built using cutting-edge technologies like React, Vite, and Tailwind and designed for all devices. As I've mentioned, I deeply enjoy delving into technologies and understanding what lies behind code writing, from best design principles to code reusability. Over time, I've also gained experience in problem-solving, attempting to tackle various issues encountered during work.

On my Github account you can find most of the projects I made.

• Cashier Attendant

Eataly

2014 - 2023

Worked for almost 10 years in this big food and beverage company famous around the world as a cashier Attendant, Setup, Eataly Today. During this period, I gained experience in communication skills, thanks to interactions with customers, especially foreigners. Also, I developed the ability to work in teams and manage workloads.

EXPERIENCE

- **Cashier Attendant**

Metro Cash and Carry

2011-2014

Work for this big cash and carry company as cashier Barrier and Supervisor when needed.

EDUCATION

- **CS50 - EDX**

Harvard

Currently finishing the introductory CS course from Harvard. I have already completed CS50T and have decided to enhance my development skills by learning new languages such as C, Python, SQL and more.

- **Front end developer course**

LabForTraining

2023

Completed a 6-months course during which I delved into the realm of Front-End Development (FED), acquiring various skills such as JavaScript, React, Angular, and more. I completed two major projects: a Netflix clone in two versions, one in JavaScript and the other in Angular.

- **Istituto Tozzi**

2007

High School Diploma

MARCO FALASCA

FRONT END DEVELOPER

DEAR HIRING MANAGER

I am writing regarding the Front End Developer position at your company.

My name is Marco Falasca, and I am a Front End developer. Over time, I have acquired a wide range of skills in web application development.

Initially, I attended a course where I gained skills that enabled me to develop two versions of Netflix, one using Vanilla JavaScript and the other Angular.

Since then, I have never stopped learning and working on projects, constantly striving to use the latest technologies and adhere to best practices in code writing and design.

Currently, I am completing the CS50x course at Harvard, acquiring skills not only from a theoretical standpoint but also practically, gaining a better understanding of how things work at a lower level with C. Additionally, I am tackling various problems and exercises in SQL, Python, and Flask, relevant to the world of web development.

I also have a **Portfolio** website developed in React, where I have showcased most of the projects I have worked on, which you can find in my resume.

I believe I am suitable for this position because, in addition to possessing excellent adaptability skills, I am someone who is eager to always learn new things, firmly believing in personal growth through interaction with others.

Currently based in Rome, I am highly motivated to gain work experience abroad, as I believe it would enrich me personally in all aspects.

Attached is my CV, where you will find listed my skills and professional experience.

Thank you for taking the time and consideration to review my resume, and I hope to hear from you soon.

KIND REGARDS,

MARCO FALASCA
